Education

Degree: BS Software Engineering
Institution: FAST National University of Computer and Emerging Sciences
Start Date – End Date: Aug 2023 – Present
Grade Description: In Progress
Relevant Courses:

- Programming Fundamentals
- Object-Oriented Programming
- Data Structures
- Introduction to Software Engineering
- Software Requirement Engineering
- Software Design and Architecture
- Database Systems

Degree: A-Levels - Computer Science
Institution: Lahore College of Arts and Sciences
Start Date – End Date: Aug 2021 – June 2023
Grade Description: Full Scholarship Recipient
Relevant Courses:

- Physics
- Mathematics
- Computer Science

Student Projects

Title: Candy Crush Saga
Date: Fall 2023
Description: A console-based game developed for the Programming Fundamentals course using C++ and the SFML graphics library.

Title: Library Management System
Date: Spring 2024
Description: A collaborative project for the Object-Oriented Programming course to help librarians and students manage library resources. Technologies used: C++, C#, Windows Forms, SQL Database.

Title: RateRover – Energy Consumption Optimization and Schedule Generator
Date: Fall 2024
Description: A system to create optimized electricity usage schedules to help users minimize bills based on their budgets. Technologies used: C++, C#, Windows Forms, MaterialSkin, SQL Database.

Title: Absolute Cinema
Date: Spring 2025
Description: A collaborative full-stack website offering a complete cinema experience, from ticket selection to snack booking and payment. Developed using HTML, CSS, JavaScript, Java, and PostgreSQL.

Title: UrbanTrack
Date: Spring 2025
Description: A collaborative lost-and-found web application designed to help users connect and locate lost items within an urban range. Built using HTML, CSS, JavaScript, Node.js, and SQL Database.

Hobbies

- Creative Writing
- Exploring UI/UX design
- Solving logic puzzles
- Watching tech tutorials
- Playing strategy games
